- Annual or six month season tickets can be bought for All Saints Road car park, you can find out more from our car park season tickets page
- A rapid electric charge point is available within this car park in partnership with Swarco e-connect. To use these charge points you can either use your contactless credit or debit card or sign up to Swarco e-connect and use their app or RFID card. Whatever payment option you are using, the charge points have an interactive touchscreen control to start and stop your parking session. The cost is the same whichever option you use and customers only pay for the energy that they use. These charge points deliver up to 50kWh via a CHAdeMO or CCS connector, which equates to approximately 175 miles of range per hour (depending on vehicle and driving style) or 22kWh via type 2 connector (77 miles range per hour) and are the best to use when you need to refill quickly.
- We are trialling a small number of lamppost charge points in this car park in partnership with Swarco e-connect. To use these charge points you need to sign up to Swarco e-connect and use their app or RFID card, the cost is per kWh used. These charge points deliver approximately 3.5kWh via a standard type 2 connector, which equates to approximately 12.5 miles of range per hour (depending on vehicle and

driving style) and are best to use when parked for longer, for example while working or for overnight charging for residents.

- All vehicles using the EV or PHEV are required to pay the standard parking charges as per the tariff board

Additional information:

- Short stay car park levels 1 and 3
- Long stay car park levels 4 and 5
- The car park is locked from 7pm every night, there is no release facility. Cars that have been locked in will not be accessible until 6.30am the following day.
- 400 spaces available
- 20 spaces for the disabled available
- 7 pay machines
- RingGo short stay (cashless service) location code 4473
- RingGo long stay (cashless service) location code 4469
- 1.8 metre height restriction
- Electric vehicle charging points are available in this car park in partnership with BP Pulse. To use these charge points you need to sign up to BP Pulse (www.bppulse.co.uk). You can either subscribe for a monthly fee or have instant access. For either option, you will need an RFID card or BP Pulse app to start and end of charging sessions. Customers pay for the energy (per kWh) that they use. Charge points are cheaper per kWh for those that subscribe and pay the monthly fee or slightly more expensive for instant access. These charge points deliver approximately 7kWh via a standard type 2 connector, which equates to approximately 25 miles of range per hour (depending on vehicle and driving style) and are best to use when parked for longer periods, for example while shopping or working.
- All vehicles using the EV or PHEV are required to pay the standard parking charges as per the tariff board
